Summary

Senior Backend Engineer with 7+ years building scalable Python/Django systems. Deep experience with REST APIs, SSO/SAML/SCIM, performance optimization, and full-text search. Strong focus on PostgreSQL query tuning, event-driven systems, and data pipeline design.

Experience

Senior Backend Developer **Jan 2021 – May 2026**
Flockjay Inc *Covina, CA (Remote)*

- Cut API response times and query counts 70% via endpoint restructuring and ORM query optimization
- Built a rule engine that compiles client-defined conditions into Django ORM queries at runtime, automating enrollment and access changes
- Implemented SSO/SCIM with Okta and Microsoft Entra, including a cross-org identity model giving one user independent roles across client orgs
- Designed and built the core content system (courses, learning paths, assets, collections) with versioning and access control, serving 15+ enterprise clients
- Integrated Salesforce, Clari, and Gong to build a library of sales calls tagged with deal outcomes, and to gate learning-path progress on real sales activity
- Built the platform's first search with PostgreSQL FTS over 100k+ documents, including call/video transcripts, at sub-200ms
- Added semantic search with pgvector over the same corpus, under 400ms
- Adopted agentic coding with Claude Code for refactors, test generation, and code review

Software Engineer **Feb 2020 – Jan 2021**
Radicali *Bengaluru, KA*

- Replaced the existing search framework with Elasticsearch, cutting search response times by over 50%
- Wrote and optimized backend tests with pytest, bringing code coverage from 40% to 70%+
- Built a data pipeline with Scrapy, SQS, and S3 to crawl 50,000+ links daily, validate and clean the data into a reliably updated dataset

Technical Mentor **Jun 2019 – Dec 2019**
Masai School *Bengaluru, KA*

- Mentored 20+ students on Python, Django, and JavaScript fundamentals across an intensive full-stack bootcamp; supported project reviews and debugging sessions throughout the program

Python Developer **Mar 2018 – Apr 2019**
Manch *Bengaluru, KA*

- Built and maintained a Scrapy/Selenium crawler that scraped and stored 10,000+ pages per day into MongoDB

Product Support Engineer **Jan 2017 – Feb 2018**
iQuanti *Bengaluru, KA*

- Built a Django app that fetched keyword rankings from a third-party API and saved results to S3 and Snowflake, cutting ad-hoc report turnaround time by over 50%

Skills

Languages: Python, JavaScript, TypeScript, SQL
Frameworks: Django, Django REST Framework, Celery, Scrapy
Databases: PostgreSQL, Elasticsearch, MongoDB, Snowflake
Infrastructure: AWS (S3, SQS, EC2), Docker, Redis, Git, GitHub Actions, Nix, Linux
Expertise: REST APIs, SSO/SAML/SCIM, Full-Text Search, Data Pipelines, System Integration

Education

Krupajal Engineering College **Bhubaneshwar, Odisha**
Bachelor of Technology, Electrical Engineering Aug 2012 – May 2016
